Alex Rivera

Data Engineer Intern

San Francisco, CA • alex.rivera.de@example.com • GitHub Profile • LinkedIn Profile

SUMMARY

Aspiring Data Engineer with a focus on high-throughput stream ingestion and scalable distributed transformations. Passionate about building robust, reproducible data pipelines using modern lakehouse architectures.

TECHNICAL SKILLS

Python | SQL | Spark | Kafka | Airflow | dbt | Docker | AWS/GCP basics | Git

EXPERIENCE

Data Platform Intern — Nexus Data Labs

Jun 2024 - Sep 2024

- Built automated streaming pipelines processing 1.5M daily events with Kafka and Spark.
- Optimized warehouse partition schemes, reducing query latency by 35%.
- Developed dbt data quality assertion tests to catch upstream schema drift.

FEATURED PROJECTS

StreamPulse

Source ↗

Real-time financial telemetry ingestion and anomaly detection pipeline.

Stack: Kafka, PySpark, Delta Lake, Docker

LakeForge

Source ↗

Automated dbt transformation pipeline models for retail analytics.

Stack: dbt, DuckDB, Airflow, SQL

TelemetrySync

Source ↗

Distributed IoT metrics sync and aggregation with Parquet storage.

Stack: Python, FastAPI, Spark, AWS S3

EDUCATION

B.S. in Computer Science State University, 2025

CERTIFICATES & ACHIEVEMENTS

- AWS Certified Data Engineer - Associate
- 1st Place - University Hackathon: Big Data Analytics Track
- Dean’s Honor List: 2023 - 2024
